

## UNIVERSITY PROSPECTS.

Leading Educational Institution.

Under the wise and conservative but progressive administration of Dr. Murphree, the new president, the University has taken on new life and energy, the evidence of which is to be found on the campus and in every department of the University, which bids fair to assume the position and continue the work designed for it by its founders.

The books for the law library, purchased from the Lawyer's Co-Operative Publishing Co., through its popular representative, H. C. Utley of Jacksonville, Florida, are arriving and are being placed on the shelves for use at the opening of the University, September 15th. When all books are in place the library will contain the Florida Reports, United States Supreme Court Reports, American Decisions, Reports and State Reports, the Lawyer's Reports Annotated, New York Common Law and Chancery Reports, New York Court of Appeals Reports, Massachusetts Reports, Michigan Reports and New Jersey Equity Reports to the National Reporter, North Western, North Eastern, South Western, South Eastern, Atlantic, Pacific and Southern Reporter, the Encyclopedia of Law and Procedure, and nearly three hundred or more of the leading text books and books of reference, making in all a library of more than two thousand volumes.

With such a library and with a faculty composed of men who have demonstrated their fitness by years of successful law school work in Florida, and including three of the leading members of the Gainesville bar in charge of legal ethics, Florida pleading and practice, Florida statutes and practice court work, the law school should command the confidence and support of the bench and bar of the State and should bring within its walls every young man desiring to thoroughly prepare himself to practice law in Florida. The prospects for the law school for the coming year are indeed bright, for there promises to be not only a large junior class to enter the school but a strong senior class as well, an unusual condition for a law school in its opening year.

Professor Chas. H. Kicklighter succeeds Prof. M. T. Hochstrasser (resigned) as Professor of Mechanical Engineering. Professor Kicklighter is a graduate of the Georgia School of Technology and a post-graduate of the University of Wisconsin. For three years he was instructor of mechanical and electrical engineering in the Georgia School of Technology. Later he organized the Carnegie School of Technology of Newberry College, S. C., from which institution he comes to us. The president of Newberry College speaks of Mr. Kicklighter as follows: "For two years he has commanded the highest respect of teachers and students of Newberry College and has shown himself a good teacher and disciplinarian. We are exceedingly reluctant to part with him."

Dr. John A. Thackston succeeds Dr. W. P. Youm (resigned) as Professor of Philosophy and Pedagogy and Director of the Normal School of the University. State Superintendent Martin of South Carolina writes that "Dr. Thackston is one of the most able men in South Carolina. He has made his influence felt throughout this country and in our teachers' meetings." President of State Normal School, Minnesota, writes that "Dr. Thackston is a well informed man in the field of education, and his wide experience, both North and South, seems to me to fit him admirably for the work in your State University." Dean Balliet of New York University speaks as follows: "Mr. Thackston is one of the best qualified students we have ever had in the department of education and is a thoroughly well-equipped man. We have no other man in the University whom we could recommend quite so strongly for your work." Dr. Thackston has also completed a book on the purpose and method of teaching mathematics in an elementary school. In Dr. Thackston the Department of Pedagogy of the State University will have an able educator as a trainer of teachers for public schools of Florida.

By the law of the State, provision must be made for the professional instruction of teachers. The University makes this provision, (1), by offering a four-year college course leading to the degree of B. A. in Pedagogy; (2), by offering a three-year course for the preparation of teachers for State certificates; (3), by offering a course preparing teachers for first-grade county certificates; (4), by offering a review course for making up deficiencies in special subjects; (5), by offering assistance in correspondence course as part

of the University Extension work. The University intends to put more stress on the training of teachers in the future than it has done in the past and the young men of this State will find just the advantages here to meet their respective needs. Teachers taking the course at the State University will be recommended to positions which they are qualified to fill and the president will render any assistance he can to county superintendents and school boards in securing principals and teachers.

The work in the agricultural courses, in the various branches of engineering, and in the classical and literary work offered will be conducted by men of great skill and superior education.

The outlook for next session is exceedingly propitious. Already nearly all of the rooms in Buckman Hall, the University dormitory, have been engaged for another year. The extensive improvements in this dormitory building, and the two new buildings which are to be erected on the University campus within the next few months at a cost of \$40,000 each, together with other improvements on the campus, and the establishment of the law school, combine to render Florida's leading institution of higher education the pride of every citizen of the commonwealth.

In this University almost every advantage that can be found in the very best educational institutions in the South is offered to the young men of the State at the actual cost of living, and it is hoped that the press of the State will assist in making known this fact to our people. Only by this means will the youth of our State be encouraged to patronize our home institution in preference to institutions of other States, where expenses are greater while advantages, in many of them, are inferior.

M. Volney, of New York, purchased fifty lots in Sanford last week, and will build fifty residences thereon as soon as contracts can be prepared.

# ALWAYS IN THE SPOT LIGHT Newbro's Herpicide

## OTHERS IMITATE BUT NONE EQUAL

Since the world was new there have been imitators. Great men and remarkable achievements are all imitated to a greater or less extent. An attempt at imitation is always a compliment—a tribute to the greatness of the man or the worthiness of the thing imitated.

That's Bully!

## Herpicide is a Scientific Achievement

The Original Remedy to Kill the Dandruff Germ and Up to Date the Only One that Does It

Others have tried to imitate it, but without success. It stands alone, the peer of all hair preparations. Used as directed, Herpicide removes the dead scarf skin, which is so unsightly and annoying, checks further accumulation by killing the Dandruff Germ, stops falling hair and brings both scalp and hair back to normal health. Unless completely atrophied, the follicles take on new life, manifested by a strong, vigorous growth of hair.

### COMPLETELY BALD FOR EIGHT YEARS

Pontiac, Illinois.  
I was almost completely bald for the last eight years, and tried every remedy advertised without benefit. Herpicide immediately removed the itching and feverish sensation. I now have a fine silky growth of hair started which is growing every day. There was no sign of a hair before.  
J. R. JOHNSON,  
Care of Reformatory.
